

NT105

NttAudiolab found there to be an

Immense interest for loudspeakers smaller than

The 104 models. With that in mind, we went to

Work and have more than met the challenge by

Developing the 105, a smaller speaker with

Sounds almost as large and true as it's bigger

Brothers. Employing three-driver configuration

The sonic performance is simply shocking! Highs are

Crisp, detailed and rich, the midrange is vibrant and

There is tight and powerful bass. The 105 is ideally

Suited for smaller listening areas and lends itself well

To all types of music. It's not always about being

Big...

Model:	105
Design:	Three-way Bi-wire
Drive Units:	1 X 10in. Front ported 1 X 6.5in Revelator 1 X 1" Tweeter Revelator
Sensitivity:	1w/1m at 91
Frequency Rep -3db:	28Hz to 48 kHz/point to point 28Hz to 50HZ
Impedance:	4 Ohm
Amp Requirements:	40 to 150W
Color:	Colors upon request
Dimensions HxWxD:	45.5 x 15 x 25.5 in
Weight	250 lbs
Shipping	2 wood Crates: 600 lbs + Accessories.
