

Ntt 106

The NTT Model 106 is our smallest and lowest cost speaker system that delivers a no compromise sonic experience in the most compact size possible. Whether augmented by one of our world class subwoofers or driven alone, the sound is delicate yet authoritative, organic and palpable with a sweeping soundstage that immerses you in the event.

Worldclass performance, an innovative aesthetic appearance and a tightly engineered integrated driver system delivers what few other speakers of any size can ... the magic of the original performance.

Available in a wide range of designer colors or in your own custom finish, the NTT 106 has been designed to provide you with a lifetime of superior service without maintenance or adjustment.

The system sits on an integrated stand that has been carefully designed to minimize vibrations and to extend the inert cabinet design providing a solid foundation for your music. One look, one listen and you'll be convinced that for the size, no other speaker even comes close.
