

When Good Enough is Not Even Close

Ntt 103[®]

The Ntt103 is a fire drive, 3 way design with the same refined style and aesthetics as our 101,s. Poised like a cobra ready to strike. The 103's dynamics and sonic performance will rival the best. NttAudiolab changed the high frequency and mid-range drive from those used in our flagship 101's with fantastic results. A 1 inch tweeter and 7 inches midrange drivers are mounted in three separate boxes, each suspended between two distinctively styled arms. This all adds up to create warmth of live, natural music. The Ntt103 has a neutral 3D stage, not exaggerated, combined with real width and depth. A rock solid bass cabinet constructed of 3.5 inches x 2.75 inches and 2 inches resin thick MDF plus muscular internal bracing to cut vibration and resonance substantially. Two 13" bass drivers provide deep, explosive bass. The ability of the Ntt103 to accurately reproduce true sound will not allow for listener fatigue. They demand your attention and will rock your musical soul.
