

N t t- 104

The **NTT** Model 104 is our response to the need for maximum engineering and audio performance

within a smaller enclosure designed to integrate into a wider range of space-limited rooms. This four driver cabinet system offers no compromises for the discriminating listener who requires full range audio response in a mid-sized enclosure. In addition, the speaker presents a friendly and easy load combined with high efficiency making it suitable for a wide range of both tube and solid state amplifiers. It can be driven with one pair of speaker wires or amplifiers or it can be bi-wired, bi-amped, or even tri-amped offering the maximum in system flexibility. Color and finish options cover the spectrum and custom colors are available typically at no extra cost. If ultimate honest audio performance is what you seek, the NTT Model 104 will surpass your expectations from its unparalleled fit and finish to its breath taking sonic performance ... welcome to the last speaker you will ever buy.

Ntt.104/Spec

Config: 3 way floor standing (Bi-wire)
Drive: 2-10" front ported (Revelator)
6.5" Sealed (revelator)
1-1" (Ring revelator)
Frequency Response: -3/18Hz-26kHz
Frequency at point: 18Hz-/ 240 Hz/ 26kHz
Sensitivity: 1W/1m +/-90db
Impedance: 4 Ohm
Crossover: 20Hz/240Hz/26kHz
Maximum Output: 94dB peaks
Sensitivity: 90db
Auto Correction: None
Recommended: 40W-300W
Color: BMW Super Black
Dimensions: H52.5" W15.5" D29.5

Made in USA
